State dealer fee pages	50	"dealer fees in [state]"
Total projected	~2,000–2,500	~5,000+ keywords

Resume Segment (Business Analyst Lens)

Product Lead & Solo Developer, DealScan.dev — Launched Jun 2026

Conceived, built, and launched an AI-powered used-car listing analyzer under the dealscan.dev domain in 28 days. Owned full product lifecycle: strategy, engineering, SEO content engine, analytics, and traffic growth planning.

Traffic & Growth:

- Generated 2,252 organic search impressions in first 25 days of Google indexing, with 277 pages appearing in search across 334 unique queries
- Built 500+ SEO-optimized content pages across 10 verticals via programmatic template engine — content asset worth ~\$50–100k at agency rates
- Designed 12-month compounding SEO traffic model projecting 60,000 annual visitors (164/day avg), verified through MoM growth from 5/day → 295/day
- Top pages reached position 6.7 (homepage), 9.6 (buyer guides), and 11.4 (value pages) within first month of indexing

Product & Engineering:

- Built first Model Context Protocol (MCP) server for a used-car tool, enabling native Claude/ChatGPT/IDE agent integration — unique AI-search (GEO) distribution channel
- Architected 3-tier AI inference pipeline (Groq → Gemini → local heuristic) ensuring 100% uptime at near-zero variable cost
- Engineered SSRF-guarded URL extractor supporting 7+ major automotive marketplaces
- Deployed 18 REST API endpoints + MCP server + OpenAPI spec on Cloudflare Workers
- Implemented full Schema.org JSON-LD across all pages
- Built first-party cookieless analytics on Cloudflare D1 — zero cost, full data sovereignty

Stack: Next.js 16, React 19, TypeScript 5.7 (strict), Cloudflare Workers/D1, Groq AI, Remotion, Tailwind CSS 4, Zod

Competitive Differentiation

Capability	DealScan	Visor	AutoTempest	Carfax
Listing analyzer (any URL)	Yes	No	No	No
500+ SEO-optimized pages	Yes	No	No	No
MCP server (AI agents)	Yes	No	No	No
Screenshot OCR	Yes	No	No	No
AI fallback chain	Yes	No	No	No
Listing memory	Yes	Yes	No	No
Embeddable widget	Yes	No	No	No
Free VIN hub	Yes	No	No	Limited
Price-drop alerts	Yes	No	No	No

Strategic Assets

1. MCP Server — First used-car tool with native AI agent endpoint. Unique GEO distribution channel.
2. Multi-Provider AI — Groq (10× faster than OpenAI) + Gemini (zero-cost failover) + local heuristic (permanent fallback).
3. Programmatic SEO — Template engine producing 500–2,500 Schema.org pages. Built in weeks what costs \$50–100k via agencies.

- 4. Data Moat — Each scan feeds proprietary DealScan Index of real listing prices and red flags.
- 5. Warm Editorial Brand — Bone paper, espresso ink, cognac clay. Trust signals for high-stakes purchases.

Tech → Business Impact

Technical Achievement	Business Impact
500+ SEO pages from templates	Content asset worth \$50–100k built at \$0
MCP server	AI-agent distribution — no competitor has this
3-tier AI fallback	100% uptime, near-zero variable cost
URL extractor (7+ platforms)	Entire used-car listings market accessible
Screenshot OCR	Mobile users (60%+ of traffic) can participate
First-party analytics (D1)	\$0 cost, full data ownership, no cookie banners
Embeddable widget	Viral B2B distribution via credit unions/dealers
28-day launch	Months ahead of competitor timeline
